VST Research

VST Research is a specialist CRO and offers a full range of clinical research services, including clinical trial monitoring, feasibility study, project management, pharmacovigilance, data management, statistics, medical writing, ICH-GCP training, and regulatory affairs consultation. We offer bespoke, intelligent and innovative solutions that facilitate the smooth delivery of modern-day clinical programs. Our approach is flexible and can be tailored to your requirements, whether it is managing an entire program or stand-alone strategic advice for a specific deliverable.

By drawing on our wealth of experience and expertise in clinical research and drug development, we strive to lead our clients' products towards regulatory approval.
